#1: With microscopic	nair comparison, even with the best no	otes, there is no way to dete	ermine the comparison
was performed correct	y		
#2: The examination re	esults set forth in the laboratory repor	are supported by the benc	h notes, but the
documentation is marg	inally adequate. The notes are not date	ted or initialed and are in po	encil. RQ uses
abbreviations to indica	te the microscopic characteristics of t	he hair. These abbreviation	s are difficult to interpret.
The technician's notes	do not document that hair was recover	ered from the Q items.
